SUMMARY

Future Full Stack Web Developer with a background in Computer Information Systems/Math and a lifelong dedication to learning. To develop user-friendly applications using creativity and problem-solving skills. Known amongst peers for being valuable when working on projects and paying attention to detail no matter the complexity of the task.

TECHNICAL SKILLS

Technical Languages: HTML5, CSS3, Bootstrap, JavaScript, Node.js, Object-Oriented Programming, Express.js, MySQL, Object-Relational Mapping, Model-View-Controller, handlebars.js, react.js, MERN stack, Progressive web applications, Material UI.
Applications: Github, GitLab, Heroku

PROJECTS

Rhythmix Concert Hub | joepinoch.github.io/project-1/
- My team and I built a web application using 2 server-side APIs, Spotify and Ticketmaster. The end goal was to provide our users with a concert-finding app depending on what you search while also providing the user song recommendations from their preferred genre at the bottom of the search.
- My core responsibilities were to make the song recommendations show up using the Spotify API and to help get the Ticketmaster API to give us results.
- I made use of the Spotify and Ticketmaster APIs, and JavaScript.

WeatherApp | joelp-11.github.io/WeatherApp/
- Used a server-side Weather API to build a user-friendly App where one can find the weather of a city and the 5-day forecast by just entering a city name in the search bar.
- This project I did myself so I had to create the HTML, CSS, and JavaScript file and handle the weather API and make sure it loads content onto the browser.
- HTML, CSS, JavaScript, Third party APIs

DocTalk | https://doc-talk-1217027d6c32.herokuapp.com/
- An application for both doctors and patients used as a hospital management app. Features a front end built with Material UI and a live chat feature accessible for both patients and doctors. This is a MERN stack application built as a group project.
- My core responsibilities here was to make use of Material UI to clean up the UI and implement a footer throughout the application, also made use of react. My other responsibility was to build and implement a live chat feature where doctors and clients can speak with each other.
- HTML, CSS, JavaScript, React, MongoDB, Express.js, Node.js, Material UI.

ADDITIONAL EXPERIENCE

Behavior Technician June 2023 - currently working
Active Steps Victorville, CA

Implemented unique ABA therapy programs for children to help improve speech and fine motor actions. Also took part in helping children control their behavior. I also collaborated with specialized peers and parents to help the child improve and gain independence as efficiently and cost effective as possible. Also committed to recording detailed data of the client during sessions to help specialized peers come up with the best treatment plan for each client.
Key Accomplishments:
- Successfully reduced the behaviors in my clients by about 80%
- Clients have also gained significant knowledge in counting, improved speech, and improved fine motor actions to the point they aren't much more delayed than an average child. This helps further in our goal of making the child independent.

Broista April 2022 – February 2023
Dutch Bros Victorville, CA
Developing an almost friend-like relationship with our consumers is essential for the job. Communication amongst peers was important as well to make sure nobody is doing the same tasks, like two people making the same drink for one order.
Key Accomplishments:
- During peak season I helped increase the tip amount for everybody which caused me to receive praise by coworkers and management.

Tax Preparer December 2021 – February 2022
Luna's Tax Services Victorville, CA
With hundreds of customers coming in every tax season I helped keep the files of the customers organized. Throughout my time here I filed taxes for 30+ customers at an efficient yet cautious pace resulting in there being 0 audits from my customers due to a keen eye for attention to detail.
Key Accomplishments:
- Worked alongside a team of 8 to file the taxes for hundreds of customers
- Due to prior customer service experience, I was able to successfully handle any customers who were stressed over taxes, even our Spanish speaking customers,which made up about 80% of our clientele.

Cashier August 2021 – December 2021
Mcdonalds Victorville, CA
Fast paced working environment where I had to frequently switch between speaking in English and Spanish in order to speak to customers. Communication amongst coworkers was also key in order to successfully handle rushes
Key Accomplishments:
- Was recognized for my quick thinking and towards the end of my time here I became a beverage specialist which was a more essential role compared to cashier.

EDUCATION

Full Stack Web Development Boot Camp Certificate: (graduated August 15th) UCLA Edx, Los Angeles, CA
A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, Javascript, APIs, JQuery, Bootstrap, Firebase, Node.js, MySQL, MongoDB, Express, Handelbars.js, and ReactJS.
Math and Computer Information Systems Associate's Degree: (will graduate May 2024)
Victor Valley College, Victorville, CA (3.6 GPA)
